Re: Westco Construction, Ltd.
Lethbridge, Alberta
Letter of Recommendation

To whom it may concern,

GEA Rainey Corporation contracted with Westco Construction to build a new manufacturing facility in Lethbridge last year. GEA is located in Tulsa, Oklahoma.

Westco Construction are true professionals in the construction management business. Derek O'Connor, Theo Vanee, and Harry Mueller were cooperative, informative, honest, with high integrity. They were always easy to contact from my office in Tulsa, Oklahoma.

During the construction phase which lasted almost a year we only came to the jobsite two times. When we came it wasn't to address an issue but to inspect the quality and schedule. Any issue that came up we handled over the phone with them and always trusted they were looking out for our best interest. If they told you they would address and solve an issue that's exactly what they did.

During the design stage they came to our facility in Tulsa, Oklahoma to better acquaint themselves with our type of manufacturing facilities. They provided ideas that were helpful and exceeded our expectations. As a result, we have a world class facility in Lethbridge that was kept in budget.

In the future we plan to expand our facilities in Lethbridge. Westco Construction Ltd will be our construction management team. You are more than welcomed to visit our facility in Lethbridge at any time.

I highly recommend them to build your building. Please feel free to contact me at any time to discuss further and into more detail.

Sincerely,

Phil L. Snodgrass
Vice President of Operations
